Profile

Motivated IT professional with hands-on experience in full-stack development and AI-powered solutions. Skilled in building scalable, user-focused applications and passionate about learning new technologies.

Work Experience

Associate Software Engineer | Purple Software (Part Time)

Aug 2024 - Current

- Developed full-stack web applications using Angular, Node.js, MongoDB, and MySQL.
- Ensured seamless frontend-backend integration and followed Agile methodologies.
- Participated in the full software development lifecycle from analysis to testing.
- Collaborated with product and QA teams, and contributed to technical documentation.

Software Engineering Intern | Purple Software

Feb 2024 - Aug 2024

- Focused on frontend development and UI integration.
- Worked within Agile sprint cycles and contributed to team-based deliveries.

Projects

Individual Projects :

• RAG-Powered Chatbot with Document Upload

Full-stack AI Chatbot – Built an RAG-based chatbot with document upload & search, using React, Node.js, Pinecone, and OpenAI, deployed on Vercel.

• AI-Powered Chatbot

Built an AI-powered chatbot using OpenAI API with Node.js and React, featuring real-time messaging and context-aware responses.

• Customer & Employee Management System (CEM)

Full-stack development using React.js, Spring Boot, and MySQL. Key features: product, payment, employee, and supplier management with invoicing and reporting.

• E-Commerce App with Admin Panel

Full-stack project built with React, Node.js, MongoDB, and Express. Implemented role-based access, payment gateway, dynamic cart, and responsive checkout.

Company Projects:

• DRP Gym Management System

Full Stack Developer – Angular, Node.js, MongoDB, MySQL

Developed user, member, payment, and attendance features with frontend integration in an Agile sprint environment.

• Gift Card Management System

Full Stack Developer – Angular, Node.js, MongoDB

Created a user and admin portal for gift card management with payment integration and tracking.

• Website Development Projects

Built and launched responsive, mobile-friendly websites using Astro, Tailwind CSS, PHP, HTML, JavaScript, and WordPress, following client designs and focusing on UX and frontend-backend integration.
